associate membership benefits

As an association for designers and contractors, AISC brings together the people who conceive, create, construct and complete projects in steel. AISC is active in four areas, which promote the use of structural steel: engineering research, marketing and promotion, fabricator services and information updates. AISC is leading an effort to expand the size and effectiveness of the industry promotional and marketing efforts against competitive materials. We hope you choose to join us.

Associate Members of the American Institute of Steel Construction enjoy many benefits, both professional and economic, including the following:

• An AISC Membership Directory complete with names, titles and phone numbers and the opportunity to meet and work with AISC members.

• Extensive member discounts, ranging from 10% on advertising in Modern Steel Construction to 50% on publications and software, workshops, seminars and conferences, and hundreds of dollars in savings on booth space at NASCC: The Steel Conference.

• A free enhanced listing on Modern Steel Construction’s online interactive Product Directory (value of $3,000/year) and discounts on job postings.

• One complimentary subscription to Engineering Journal.

• Technical assistance from our engineering staff at the Steel Solutions Center (aisc.org/solutions).

• The use of the AISC Associate Member logo on company letterhead, business cards, websites and in advertising, as well as a membership plaque issued to all Associate Members.

• A direct internet link from the AISC website directly to our member websites, dramatically increasing your visibility (for web statistics, visit the AISC website at www.aisc.org).
Individuals, firms or corporations that engage in multiple phases of the industry and qualify for more than one level of membership are eligible only for the highest category of membership available to them. For more information on which category may be best suited to your company, please contact the membership department at membership@aisc.org.

**full membership**

Any firms or corporations engaged in the fabrication of structural steel in the United States of America may be admitted to Full Membership. A firm or corporation shall include any subsidiary or controlled entities, or any entity in which it has a majority interest, engaged in the fabrication of structural steel or iron.

Additionally, any firms or corporations with production or distribution facilities in the United States of America engaged in the production or distribution of hot rolled steel plates or shapes or of Hollow Structural Sections (HSS) used in the fabrication of structural steel and iron, may be admitted to Full Membership. A firm or corporation shall include any subsidiary or controlled entities, or any entity in which it has a majority interest, engaged in the production or distribution of hot rolled steel plates or shapes or of HSS.

**associate membership**

This category is reserved for firms that do not fabricate, produce, or distribute structural steel, but are participants in the structural steel industry. Associate Membership includes:

- firms or corporations engaged in the manufacture of products, equipment, machinery, or other facilities generally used in the fabrication of structural steel (as well as non-domestic producers and distributors).
- firms or corporations engaged in some phase of the structural steel industry. Today this includes, but is not limited to: pre-engineered metal building manufacturers, steel joist manufacturers, computer software vendors, used equipment dealers, erectors, galvanizers and industry consultants.
- firms or corporations engaged in the service of steel detailing.

Dues are paid annually and are based upon the Associate Member’s category. Associate Membership is not restricted to U.S. Applicants.

**affiliate membership**

Affiliate Membership is available to general contractors, construction managers, code officials and building inspectors worldwide. Membership in this category is limited to persons who work for companies that do not qualify for Full or Associate Membership. Affiliate Membership dues are paid annually. Affiliate Membership is not restricted to U.S. Applicants.

**student and educator**

Student and Educator membership is available to those teaching or studying architecture, engineering, or construction management at a four (4) year accredited university in the United States.

Student and Educator membership is complimentary. Proof of affiliation with the accredited university must be submitted at the time of application.

**professional membership**

Professional Membership is available to engineers and architects worldwide having a degree in Engineering or Architecture. International applicants must translate all documents into English. Membership in this category is limited to persons who work for companies that do not qualify for Full or Associate Membership.

Professional Membership dues are paid annually. Professional Membership is not restricted to U.S. Applicants.

notes

Associate Members who perform services or function in the capacity of a Full Member, i.e., contract or subcontract for the fabrication of structural steel, shall be responsible for the payment of Full Member dues tonnage and the payment of dues in the same manner as a Full Member to the nature and extent of such contracting or subcontracting. The annual dues for Associate Members shall be applied as credit toward the amount of dues owed for tonnage purchased/shipped.

AISC membership dues are not deductible as charitable contributions for Federal Tax purposes, however, they are deductible as an ordinary and necessary business expense.
