Governing Requirements for Certification Programs

Purpose

The Governing Requirements for Certification Programs (GRs) are provided for identifying the activities required to demonstrate that the participating company’s management system fulfills the requirements for certification to the selected standard and other normative documents. The GRs provide for the administration of the audit program from application to certification. They also contain clarifications, explanations, and additional requirements to those found in the Standard of Certification Programs (AISC 207-20).

The document pyramid shown below, illustrates the hierarchy. The GRs sit at the top of the pyramid as the foremost document. They are supported by the applicable “certification standard”. Within the certification standard, “other referenced industry documents” are mentioned, which include the Code of Standard Practice (AISC 303), ASTM Specifications, AWS Welding resources, etc. Finally, the “contract referenced specifications and codes” provide for job/project specific needs. These may require a specific version of an industry document or require the use of a specific manufacturer’s product. There may also be unique requirements of the job/project that are specific to the customer.

Certification Bulletins are also utilized to communicate changes occurring outside the GRs annual publishing date. Their purpose is to explain the change and why it is occurring, plus they provide clarity and program transparency. Bulletins are issued via email and posted to https://www.aisc.org/certification/bulletins.
Preface

The 2023 revision is not a complete revision of the Governing Requirements for Certification Programs (GRs) but does include important changes and updates including, such as terminology defined in the glossary below. The following changes included in this revision are listed below.

Section and Requirement Revisions

- Preface - No Changes
- Glossary - Revision
- Table of Contents - Editorial
- Scope - No Changes
- Intent of Use - No Changes
- Certification Programs - No Changes

Section 1 General Requirements
- 1.8 - Editorial
- 1.10 - Revision
- 1.11 - Editorial
- 1.13 Editorial
- 1.17 New Requirement
- 1.18 New Requirement

Section 1.1 Communications
- 1.1.1 - Editorial
- 1.1.2 - Editorial

Section 2 Applying for Certification
- 2.1 - Revision
- 2.2 - Revision
- 2.4 - Revision
- 2.6 - Revision

Section 3 Stage 1 Documentation Assessment
- 3.1 - Revision

Section 4 Planning for Your Audit
- 4.1 - Revision
- 4.2 - Editorial
- 4.3 - Revision
- 4.5 - New Requirement
- 4.7 - Revision
- 4.7.1 - Revision

- 4.8 Editorial
- 4.11 - Revision

Section 5 During Your Audit
- 5.1 - Editorial
- 5.2 - Editorial
- 5.7 - Editorial

Section 6 Corrective Action Request Process
- 6.1 - Revision
- 6.3 - Revision

Section 7 Certification Decisions
- 7.1 - Revision
- 7.1.1 - Revision
- 7.4.1 - Editorial
- 7.5 - Editorial
- 7.6 - Revision
- 7.7 - Editorial
- 7.9 - Revision
- 7.10 - Editorial

Section 8 Making changes to the Certification Scope
- 8.1 - Editorial
- 8.3 - Revision

Section 9 Appeal Process - No Changes

Section 10 Complaint Process
- 10.5 - Editorial

Supplemental Requirements
- See each Supplement for a list of revisions.
Glossary

Additional Audit. Audits used as a follow-up to a renewal, initial, appeal, or complaint audit, and it may be required for the participant or applicant’s certification to continue or be granted.

Assessment. Evaluation of the ability of the management system to meet the audit requirements.

Audit. Independent and documented process for obtaining objective evidence and evaluating it to determine the extent to which the criteria/requirements are fulfilled.

Continuation Audit. Audits that continue a remote or site assessment.

Conditional Certification. A conditional certification may be granted as a result of the following:
  ● A Stage 2 audit cannot be conducted as a site assessment and is conducted as a remote assessment
  ● A certification determination from the Certification Review Group.

Demonstration of Capability. Representative work that is of equal or greater complexity, follows the QMS, and can be used to demonstrate capability for a certification program or endorsement as required in the GRs and/or Supplements. AISC published and approved mock exercises (if available) can also be used for a Demonstration of Capability.

Document Review. A review of a Participant or Applicant’s quality manual and procedures during the Recertification Audit (RF) to assess their ongoing compliance. A DocumentationReview may also be performed at the auditor’s discretion during a renewal audit if they deem it necessary to assess the Participant’s or Applicant’s compliance with the GRs.

Eligibility Review. A review to confirm that a Participant or Applicant meets the necessary prerequisites for the certification(s)/endorsement(s) they are applying for. The review will confirm that the Participant or Applicant will have representative work in the shop or an active jobsite to demonstrate capability to meet the GRs.

Employee Count. The number of all administrative, shop or field employees that have any role in the quality management system to be AISC certified, this includes maintenance and QC personnel. This should not include contracted employees on a temporary basis..

International. Any Participant or Applicant is considered international, if they are located outside the 50 states and the District of Columbia of the United States of America. Participants or Applicants located in US territories, please contact AISC at certification@aisc.org for payment information.

Mock Exercise. A demonstration of capability that uses an approved exercise provided by AISC Certification, not actual work, to demonstrate capability for a certification program or endorsement as required in the GRs and/or Supplements.
Observers. A Participant’s or Applicant’s members outside of the facility which can include: consultants, regulators or justified personnel. They cannot influence or interfere in the audit process or audit outcome. Observers are to be agreed upon by the audit team and the participant or applicant.

Participant Portal. Online system used by participants to view and update their account information as well as view invoices, audit plans, audit findings, corrective action requests (CARs), and certificates. The portal is also used for submitting evidence in the CAR review process. The following persons will be given access to the portal: certification contact, principal office, accounts payable and QA/QC contact.

Quality Management Company (QMC). The exclusive auditing body of the AISC Certification Program. QMC conducts the audits of a Participant’s or Applicant’s quality management system and gives recommendations to AISC, but ultimately, AISC determines whether or not to certify a company.

Remote Assessment. An audit conducted remotely using technologies such as Zoom Meetings.

Repetitive Corrective Action Request. When a corrective action is written against the same section, subsection, clause, and/or element of one or more referenced criteria in a previous CAR.

Site Assessment. An audit conducted in-person at a fabrication facility or erector’s job-site and main office.

Stage 1 Audit. A documentation assessment is performed to determine the readiness of a quality management system for certification. It includes a review of the quality manual, associated procedures required by the certification program and sample records that show compliance with the requirements.

Stage 2 Audit. A remote assessment, site assessment or combination of both that are performed to determine the effectiveness of the implementation of the written quality management system during the initial application process.

Technical Experts. Technical experts shall not act as an auditor and must be accompanied by an auditor.

Unannounced Audit. An audit performed without prior notice. A participant will not receive an emailed audit date notification, an invoice indicating the audit date, or a window of time when the audit will occur. There will be no communication from the auditor before the audit. The auditor(s) will present themselves at the company, and that company must provide immediate and unrestricted access for them to conduct the audit.

Scope

This document (hereinafter referred to as the GRs) governs the AISC certification programs. All Applicants and continuing Participants are required to have available and comply with these GRs. An Applicant is a company that is requesting certification for a fabrication/manufacturing facility or erection company that does not hold a current AISC certification. A Participant is a company that holds a current AISC certification and is seeking to continue the certification for that fabrication, manufacturing facility, or erection company. A Participant applying for additional certifications or endorsements, which are called Scope Changes, is also considered an Applicant.

The words shall, must or will indicate a mandatory requirement. The word should indicates a recommendation. The words could, can, or may indicate an opportunity to make a choice.

Intent of Use

Regardless of whether individual contracts specify AISC Certification, certified companies are required to apply their Quality Management Systems (QMS) and Safety Management Systems (SMS) to all work meeting the scope of their certification(s) and endorsement(s), as described in Section 1 of the GRs. Any contract can be used during the audit to demonstrate the capability of the company to meet these GRs.

Certification Programs

AISC offers and issues certifications for the structural steel industry. The certification programs are described in Section 1 below.

AISC also offers optional endorsements, which can be added to the certification scope. An endorsement reflects a firm's adherence to any additional requirements or standard specified for specialized steel fabrication or erection on a project. e.g. Fracture Control, Seismic, Bridge Erection, etc. To hold an endorsement, a Participant must hold a current and eligible certification. For each endorsement, see the corresponding Supplemental Requirements (hereinafter referred to as the Supplements). Applicants must apply for an eligible certification to also apply for an endorsement.
Section 1 General Requirements

1.1 Certification Program for Building Fabricators (BU) applies to Fabricators who fabricate and supply, via bolting and/or welding, structural steel frames for buildings. See Section 2.1 of the AISC 303 Code of Standard Practice for Steel Buildings and Bridges for the definition of structural steel. Participants and Applicants of this program are required to adhere to the GRs and to the Supplemental Requirements for Building Fabricators.

1.2 Certification Program for Highway Component Manufacturers (CPT) applies to Metal Component Manufacturers who manufacture and supply highway components that include bracing not designed for primary loads (diaphragms, cross frames, and lateral bracing); camera, light, sign and signal support structures; bridge rails; stairs; walkways; grid decks; drains; scuppers; expansion joints; bearings; ballast plates; and mechanical movable bridge equipment. Participants and Applicants of this program are required to adhere to the GRs and to the Supplemental Requirements for Highway Component Manufacturers.

1.3 Certification Program for Bridge Fabricators (SBR, IBR, ABR) applies to Bridge Fabricators who fabricate and supply steel highway and railroad bridges. Participants and Applicants of this program are required to adhere to the GRs and to the Supplemental Requirements for Bridge Fabricators. The categories for types of bridge fabrication all require the same level of QMS but differ in fabrication capability. Three categories are available:
   - SBR: Certified Bridge Fabricator – Simple
   - IBR: Certified Bridge Fabricator – Intermediate
   - ABR: Certified Bridge Fabricator – Advanced

1.4 Certification Program for Erectors (CSE) applies to Erectors who erect, via bolting and/or welding, structural steel framing for buildings, highway, or railroad bridge construction. See Section 2.1 of the AISC 303 Code of Standard Practice for Steel Buildings and Bridges for the definition of structural steel. Participants and Applicants of this program are required to adhere to the GRs and to the Supplemental Requirements for Erectors.

1.5 Certification Program for Hydraulic Fabricators (HYD, HYDA) applies to Fabricators who fabricate and supply hydraulic metal structures. Participants and Applicants of this program are required to adhere to the GRs and to the Supplemental Requirements for Hydraulic Fabricators. Two categories are available:
   - HYD: Hydraulic Metal Structure Fabricator - Standard
   - HYDA: Hydraulic Metal Structure Fabricator - Advanced

1.6 The applicable Standard of Certification Programs (hereinafter referred to as the Standard) is identified in the Supplements. Whenever there is a conflict between the GRs or Supplements and the Standard, the GRs and Supplements govern. A Bulletin implementing a temporary revision may supersede the GRs until the revision is incorporated into the next edition of the GRs.

1.7 GRs and Supplements are included in the audit scope, and a nonconformance may result in a Corrective Action Request (CAR) being issued by the auditor.
1.8 **Supplements** may include a section that provides clarification and further explanation of criteria found in the **Standard**.

1.9 Fraud or attempted fraud is not permitted by employees or other representatives of the Participant or Applicant. Fraud includes falsification of records, along with attempts to influence an auditor or the certification process.

If this occurs at any time during the application or renewal process prior to a final determination by the Certification Review Group (CRG), the certification process will be suspended, and the case referred to the CRG for determination.

1.10 The Fee Schedules are provided at [www.aisc.org/certification](http://www.aisc.org/certification) and are subject to change.

- Applicants: Refer to GR 2.1 concerning payment of fees.
- Invoices will be uploaded to your participant portal approximately 90 days prior to the date of your audit. An email will be sent to the accounts payable contact, certification contact, and principal officer on file for your company when the invoice has been uploaded.
- **Full** payment of certification invoices must be made by the due date listed on the invoice. If an audit is canceled for failure to pay, the Participant will be withdrawn at the conclusion of their current certificate and must reapply to regain certification. **The Participant may not pay the invoice at a later date and resume certification or reschedule the audit.**
- For audits canceled less than 30 days before the audit date, the Participant will be eligible for a 50% refund of their paid certification fees.
- For audits canceled within 48 hours of the audit date, the Participant will be withdrawn at the conclusion of their certificate and **will not be eligible for a refund** of their paid certification fees.
- The Initial Application and Expedited Fees as noted on the Fee Schedule are both non-refundable once payment is received.

1.11 The table below lists the current certifications and endorsements, and those that have been superseded:

1.12 All time frames listed throughout the GRs are listed in calendar days.

1.13 All correspondence, discussions and interviews through the application and renewal processes will be conducted directly with or in the presence of the Participant’s or Applicant’s designated representative (See GR 1.1.2). **Consultants can not be a participant's or applicant's designated representative.** Certification contacts and principal officers are not required to be present at the audit or be the designated representative during the audit.

Consultants may be present during the audit as an observer, but they cannot participate in the audit nor can they be named as a designated representative. Additionally, consultants may be asked to leave the audit if they are disruptive or try to influence the audit process or outcome. Noncompliance will result in the audit being suspended, and an Additional Audit Fee will be assessed to complete the audit at a later date.

Consultants include those who have participated in the establishment and implementation of the quality management system through activities such as preparing/producing manuals and procedures or who give specific advice, instruction or solutions toward development and implementation of the quality management system. Consultants who are under contract to provide ongoing, specific services such as safety management, NDE inspection, translators, etc. may participate during the audit as determined by the auditor.

1.14 Observers may be present during the audit but shall not participate in or influence the audit process or the outcome of the audit, as determined by the auditor. At the auditor’s discretion, observers may be asked to leave the audit. Noncompliance will result in the audit being suspended, and an Additional Audit Fee will be assessed to complete the audit at a later date.

1.15 AISC retains the right to send observers to any audit for the purpose of monitoring program compliance, internal audits, or third-party audits. AISC will provide advance notification of the observer and the purpose of the observation to the Participant or Applicant. If an observer is denied access to the audit by the Participant or Applicant without demonstrating a conflict of interest, the audit will be canceled and certification will be withdrawn or denied.

1.16 Participants or Applicants may not record (video or audio) any part of the on-site audit or remote assessment.
1.17 All information provided by a Participant or Applicant will be kept confidential by AISC and QMC. An exception could occur when the Participant or Applicant makes it publicly available or when agreed upon with AISC.

If the need arises for the release of confidential information by either law or contractual requirements, the Participant or Applicant would be informed of the release of information unless prohibited by law. This confidentiality includes information obtained from sources other than the Participant or Applicant (e.g., complainant, regulators).

1.18 Harassment or retaliation will not be tolerated. Harassment in any form, including sexual harassment and discriminatory harassment, will not be tolerated by AISC or QMC.

Without limitation, examples of sexual harassment include unwelcomed sexual advances, uninvited touching, sexual comments about someone’s physical appearance, and any other conduct of a sexual nature that creates a hostile environment. Also without limitation, examples of other harassment include slurs or epithets, threats, derogatory comments, unwelcome jokes, teasing, and any other kinds of verbal or physical conduct protected by applicable federal, state, and local laws.

Retaliation will not be tolerated. We won’t retaliate – or allow retaliation – against you if you complain, assist in an investigation, or file an administrative charge or lawsuit alleging discrimination or harassment truthfully and in good faith.

If you believe you’ve been subjected to conduct or retaliation that might violate these requirements, please contact Todd Alwood, AISC Vice President of Membership and Certification, at 312.371.0819 or alwood@aisc.org.

Section 1.1 Communications

1.1.1 AISC relies on email and the participant portal to communicate with Participants and Applicants. Any changes to contact information MUST be provided to AISC. See GR 1.1.2 concerning Company Profile. It is the Participant’s and Applicant’s responsibility to ensure communications are being received. Failure to update AISC Certification with current contact information will result in missed invoices, audit date notifications, program updates, canceled audits, and delayed or withdrawn certificates.
1.1.2 Company Profile includes company information and contact information. Refer to GR 1.1.1. Changes in ownership, location, and company name will be reviewed on a case by case basis and may require additional audits or be subject to certification termination. **Certificates are not transferable and can not be listed as an asset in a sale** Therefore, the Participant and Applicant is required, **within 30 days of the completed change**, to submit the Company Profile form (aisc.org/certprofile) to inform AISC of changes to any of the following:

Facility: Company name, physical address of facility/main office, mailing address, and ownership

Contacts: The names, telephone, and email of the following designated individuals:

- **Principal Officer.** Member of executive management of the company (i.e. CEO, GM, Pres, VP). This person will be copied on select correspondence related to program & audit activity.
- **Certification Contact.** Designated representative for program & audit activity. This person will be copied on select correspondence related to program & audit activity.
- **Accounts Payable.** Main point of contact for invoicing. This person will be copied on select correspondence related to receipt and payment of invoices.
- **Quality Assurance/Quality Control (QA/QC) Manager.** Management’s designated representative for quality. This person is copied on select correspondence related to audit activity.

If your company is potentially or planning a future move, sale or personnel changes that have not occurred yet and you would like discuss the potential implications of such changes, send an email to certification@aisc.org regarding the details and date changes will or may occur if known.

While one employee may hold multiple positions, each Participant and Applicant must provide a minimum of TWO unique email addresses for two DIFFERENT employees to ensure proper communication. Certificates may be held, and certification may be withdrawn if proper contact information is not provided.

1.1.3 If a Participant or Applicant opts out of receiving email communication from AISC or AISC Certification, important program information will be missed, such as bulletins, newsletters and other emailed mass communications. AISC Certification is not responsible for the consequences from missed emails.

1.1.4 Not Used.
Section 2 Applying for Certification

2.1 The process begins by submitting the AISC Certification Online Application which includes filling out the online application form and uploading the required Application Document Submittal. The list of required documents can be found at https://www.aisc.org/certification/applicants. Documents can only be submitted in PDF format. All Application Submittal Documents must be uploaded at the time the online application form is filled out or the application will not be accepted.

After the application is processed, an invoice covering the base certification fee along with the non-refundable initial application fee will be emailed to the Applicant with a payment due date of 14 days.

If the payment is not received by the invoice due date, the application will be terminated, and the Applicant will be required to reapply when they can complete the application requirements in the time frame.

More information on applying for certification, including the online application and fee schedules, can be found at www.aisc.org/certification/applicants.

2.2 An Eligibility Review is the first step in the application review process.

- This review will confirm that the Applicant meets the necessary prerequisites to be considered for the certification(s) they are applying.
- The review will confirm that the Applicant will have work in the shop or an active jobsite for the initial audit to demonstrate capability to meet the GRs (see the Supplements for more information).
- Following the first review of the application submittal, additional documents may be requested. Requests for additional documents must be responded to within 14 days. If no response is received, the application process will be terminated.
- The Eligibility Review will continue for up to 45 days after the date of the initial review. If the Eligibility Review is not completed within 45 days, then the process will be terminated and the Eligibility Review Refund (see Fee Schedule) will be given. If the Eligibility Review is terminated, the Applicant must wait three months from the date of termination before reapplying.

2.3 Following the Eligibility Review, initial certification audits for Applicants are performed in two stages. Stage 1 Audit is a readiness review of the Applicant’s Quality Management System (QMS). For erector Applicants, their Safety Management System (SMS) is also included. The objectives of Stage 1 is to:
   - Review the documentation of the management system(s)
   - Evaluate the status and understanding of the requirements for the programs and endorsements that are being sought
   - Review if the internal audits and management reviews are being planned and performed
   - Obtain information regarding qualifications of personnel resources and readiness of processes and equipment resources

All Stage 1 reviews follow the process described in Section 3. After Stage 1 is satisfactorily completed, the Stage 2 Audit (see definition in the Glossary) will be scheduled.
2.4 Stage 2 must be completed within one year from the completion date of Stage 1. We will allow a one-time reschedule to occur within the one year. Any subsequent site audit reschedules due to Applicant request, will result in a rescheduling fee being incurred. If Stage 2 does not occur within one year, the application will be terminated, and the Initial Application fee and Stage 1 fee will not be refunded. For more information about the Stage 2 process, see Section 4 Planning for the Audit.

2.5 If the Applicant cannot complete Stage 1 in the allotted time or the Applicant becomes unresponsive to communication from AISC, the Stage 1 process will be terminated, and the certification fee will be refunded less the Stage 1 Audit Fee and the Initial Application Fee. The Applicant must wait at least three months from the date of the Stage 1 termination before reapplying.

2.6 An Expedited Application Process (EAP) is available on the Fee Schedule for domestic Applicants only.

- The EAP places a priority on the entire application process.
- The Stage 2 process will be conducted within 60 days of the completion of the Stage 1 Audit, as noted on the Fee Schedule.
- The success of this process relies on timely responses from the Applicant during the Stage 1 process and availability of work in the field or shop.
- The Expedite Application Fee is non-refundable.

2.7 Participants and Applicants are eligible to apply for as many AISC certifications and endorsements as provided by the GRs. Separate certificates are issued for fabricator/manufacturer and erector programs, and they require separate applications, Stage 1, and Stage 2 Audits. Refer to Section 8 of the GRs to add programs to an existing certificate, or see Section 2 if not currently certified.

**Section 3 Stage 1 Documentation Assessment** (required for Applicants and may be required for Scope Change Applications or as directed by Certification Review Group)

3.1 Following the first review of the Stage 1 process, a Stage 1 Nonconformance Report (SNR) will be issued to the Participant or Applicant). All deficiencies noted on the SNR must be responded to within 30 days of receipt, or the Stage 1 process will be terminated and the certification fee refunded less the Stage 1 Fee.

3.2 If revised SNRs are issued, they must be responded to within 15 days of receipt, or the Stage 1/Scope Change process will be terminated and the certification fee refunded less the Initial Application and the Stage 1 Fee.

3.3 The resolution process for the SNR may continue for up to 90 days after the date of the initial SNR. If Stage 1 is not completed within 90 days, then the process will be terminated and the certification fee refunded, less the Initial Application and the Stage 1 Fee. If Stage 1 is terminated, the Applicant must wait at least three months from the date of the Stage 1 termination before reapplying.

3.4 The Quality Manual and all the documented procedures and records required for Stage 1 shall be submitted in English.

3.5 The requirements for a “documented procedure” stated in the Standard section 1.5.2 are to be applied to all required documented procedures in the Standard.
3.6 For Participants applying for a Scope Change, see GR Section 8 Making Changes to the Certification Scope.

**Section 4 Planning for Your Audit**

4.1 Participants: You will be notified of your audit date via email and on your certificate renewal invoice.

Applicants: The Stage 2 Audit date notification will be emailed to the principal officer, certification contact and accounts payable contact. See Section 2 Applying for Certification for information regarding initial applicant invoices.

Hard copies of invoices or audit date notifications will not be sent to Participants or Applicants.

4.2 Audits are scheduled and grouped together by climate and geographical location. Based on this, each Participant is assigned an audit week. Audit weeks will typically remain the same for renewal audits year to year. Since scheduling is based on climate and geographical location, sister companies may or may not be grouped together and audited within the same week.

Participants should plan on their audit taking place during their assigned audit week each year unless they have been notified otherwise.

**AISC reserves the right to change your audit week if necessary. Repackaging of your audit week may occur due to new or withdrawn participants, participation in the dual audit or multi-site audit programs, holidays, natural disasters, and conflicts with events like NASCC: The Steel Conference.**

4.3 Your QMS is a system that is established, implemented and maintained at all times within your organization, and it cannot reside or be dependent on one person preparing for or being present for an audit. AISC will not reschedule audits for the following reasons:

- Absent personnel
- Vacation conflicts
- Small company size/limited staff availability
- Busy production schedules
- Loss of personnel (including the certification contact and quality manager)
- Not prepared
- Conflicts with other audits
- Or other similar circumstances

If you are granted an audit reschedule, it may be rescheduled as an unannounced audit with the same time duration. Please contact certification@aiosc.org with scheduling questions. **Rescheduling fees will apply.**
4.4 You may request to change your annual audit week, and you must submit the request to certification@aisc.org. Approval of requests are dependent on audit schedule and auditor availability, and there is no guarantee that your request can be accommodated as any change must conform to GR4.3. If approved, the new audit week will not take effect until the following year, and the current audit date will remain as scheduled.

4.5 Audits must be completed a minimum of 45 days before the certificate expires for an extended certificate covering the review process to be granted. If the audit does not occur before the expiration of your current certificate, an extended certificate will not be granted and the CRG will make a decision on whether or not the certificate renewal process will be terminated.

4.6 AISC reserves the right to reschedule an audit due to circumstances beyond its control (i.e., weather, flight cancellations, political environment changes, unexpected auditor unavailability, internet loss, power outages, etc.). If this occurs, no rescheduling fees will be assessed, and every attempt will be made to reschedule the audit as soon as possible.

4.7 AISC Certification conducts periodic audits. A typical three-year Certification Cycle consists of the following, at a minimum:

- Initial Certification (RFN) or a Recertification (RF)
- First Renewal (R1)
- Second Renewal (R2)

These characters of the audit scope indicate the certification cycle, not the processes to be assessed during the audit. The scope of the audit, which are the activities and processes to be assessed, is indicated in the audit plan which is uploaded to the firm’s participant portal. An email will be sent to the certification, principal and quality contacts on file when the plan has been uploaded.

Audit plans will be emailed to the certification contact on file for a firm as well as uploaded to their participant portal no later than 45 days prior to the audit and no later than 30 days prior to the audit.

Your audit date remains the same regardless of when you receive the audit plan.

AISC reserves the right to conduct any audit in the Certification Cycle as a Remote Assessment. See GR4.9 for Applicants.

4.7.1 Audit durations will be either one or two days based on the size of your company and the complexity of your certifications and endorsements. Audit durations will be confirmed on the invoice or audit date notification. Below are additional clarifications for audit durations, and AISC reserves the right to modify these durations based on a case-by-case basis.

- Fabricator Participants with 100 or fewer employees will have a one-day audit.
- Participants with Multiple facilities or participants holding both fabricator and erector certifications will have the duration determined by AISC.
• Participants who will have a two-day audit:
  ○ Fabricator Participants who hold the Complex Coatings Endorsement (CCE) and/or the Fracture Control Endorsement (FCE)
  ○ Fabricator Participants with more than 100 employees
  ○ Erectors
  ○ Applicants within North America
  ○ Hydraulic Fabricator - Advanced (HYDA)

• Applicants and Participants outside of North America will have a minimum two-day audit.

4.8 A quality manual, documented procedures, and records shall be available upon request by AISC or QMC and provided in English.

4.8.1 All audits will be conducted in English. If translation is required, a translator that is familiar with the industry terminology shall be provided by the participant/applicant.

4.9 Audits are performed as a Remote Assessment, Site Assessment, or a combination of both. Remote assessments are conducted using technologies such as Zoom Meetings. At a minimum, one audit is required for each Participant annually.

4.10 Applicants must submit records of their internal audit and management review as required by the Application Document Submittal process. Records of the internal audit and management review must include evidence of the audit/review results, when these activities took place, the person(s) performing the audit/review, and evidence that all applicable certification programs and endorsements were audited. Records must be available for the site audit.

4.11 For Participants seeking renewal of certification, the internal audit must include all required certification programs and any endorsements. The internal audit and management review must be completed annually, not to exceed 12 months. Records of the internal audit and management review must include evidence of the audit/review results, when these activities took place, the person(s) performing the audit/review, and evidence that all applicable certification programs and endorsements were audited. Records must be available during the site audit. Participants may perform a single audit or perform several audits throughout the year, as long as all applicable certification programs and endorsements are audited.

4.12 The designated Management Representative may perform the entire internal audit, including endorsements. It is preferred to use other personnel to perform the internal audit so that independence from the function being audited can be maintained.

4.13 International Travel Advisory. If the Participant or Applicant company is located in a country for which the U.S. Department of State has issued a Travel Advisory Level 3 or 4 advising U.S. citizens against travel, the certification renewal audit will be planned as a Remote Assessment, at AISC Certification discretion.

   Alaska, Hawaii, and US Territories. If travel bans are issued by US or local governments, the certification renewal audit will be planned as a Remote Assessment, at AISC Certification discretion...
Section 5 During Your Audit

5.1 To ensure that the audit maintains impartiality and avoids any conflicts of interest, Participants and Applicants must notify AISC via email to certification@aisc.org if the auditor assigned to them has been used as a consultant in the two years prior to the audit date, the auditor has been an employee of or contracted by the Participant or Applicant within the previous five years cannot or represents any other conflict of interest, within five business days of receiving the auditor assignment and the audit will be reassigned to a different auditor at no expense to the Participant or Applicant.

If notification is not received within this timeframe, the audit assignment will be at the Participant/s/Applicant's expense.

5.2 All references in Section 1.3 of the Standard, the quality manual procedures, documents, and records required by the Standard and the GRs must be available in English.

5.3 Participants and Applicants are required to have the 2019 or 2022 version of Selected ASTM Standards for Structural Steel Fabrication, as published for AISC, or equivalent content to satisfy Section 1.3.c of the Standard.

5.4 Quality goals, as referred to in Section 1.5.1 of the Standard, may be singular or plural. Having a single quality goal is acceptable.

5.5 Interpreters must be provided by the Participant or Applicants for the auditor’s communication during the audit, as necessary. Interpreters must be knowledgeable of the appropriate industry terminology.

5.6 All personnel involved in the quality management system may be either employees of or contracted by the Participant or Applicant. In the case of the latter, contract status and qualifications must be demonstrable.

5.7 During the audit, the auditor may identify and document in the Audit Findings report, five audit findings described below and summarized in Table 1. Audit findings can indicate conformity meeting or exceeding requirements, or an audit finding can indicate nonconformity where requirements are not met. These audit findings and the needed action for each are:

- **Identified Strengths.** Functions or processes that could represent process excellence, unique ability, or potential competitive advantage. These are to be reviewed during the management review meeting, and no further action is required.
- **Opportunities for Improvement.** Suggestions or opinions based on the auditor’s experience that could add value to the QMS or the erector’s safety management systems. These are to be reviewed during the management review meeting, and no action is required.
- **Areas of Concern (AOC).** Below are several examples of an AOC:
○ Used to inform Participants of recent changes to required references or the Standard.
○ Used as a participant alert that at next year’s audit, they may need to perform demonstration of capability, as stated in 5.11 of the GRs, as well as in the Supplements for each certification or endorsement.
○ AOCs do not apply to the GRs.

The participant needs to engage their Quality/Safety Management Systems, to review, evaluate and implement corrections to an AOC. AOCs will be reviewed at the next audit for effective implementation. Any not effectively implemented will be viewed as a breakdown of the Quality/Safety Management System, and a Corrective Action Request (CAR) will be issued.

- **Audit Nonconformances.** Written to indicate that a nonconformity has been observed that is found to be a single lapse in the QMS or an omission of a requirement that does not indicate a failure of the QMS to control products and processes. An Audit Nonconformance requires the Participant to use their corrective action system to document the nonconformance, identify the root cause and implement actions to prevent recurrence. The Nonconformance will be reviewed during the next audit. If, during the next audit, the actions taken are observed to be ineffective, a Corrective Action Request will be issued.

- **Corrective Action Requests (CAR).** When a nonconformity is observed that indicates a breakdown in the QMS that may result in the release of nonconforming product, or the failure of the QMS to meet its objectives, or a nonconformance has been found to be repetitive indicating a systemic issue, then a CAR will be issued. See Section 6.
Table 1 - Audit Findings, Explained

</tr>
</tbody>
</table>

5.8 Repetitive CAR. Failure to effectively implement a corrective action for a previous CAR will result in a new CAR being marked “Repetitive”. Repetitive CAR(s) indicate a breakdown of the management system and will affect the decision made by the CRG and may put the certification at risk. See Section 7.

5.9 At the conclusion of the audit, the Audit Scope sheet will be acknowledged by the Management Team Representative and the auditor. Acknowledging this form indicates that the audit has been completed as described on the form and that the Participant and Applicant understands the audit results and requirements for completing any Corrective Action Requests. It also indicates that there were no conflicts of interest between the auditor and the company.

5.10 During the Recertification audit (RF), the auditor will perform a Documentation Assessment, in accordance with the audit plan, of the quality manual and procedures to assess their ongoing compliance. Additionally, the auditor may choose to conduct an Documentation Assessment during a renewal audit if they deem it necessary to assess the Participant’s compliance with the GRs.

5.11 Demonstration of capability as noted in the GRs and Supplements can be Representative Work or Mock Exercises. Representative work is work that is of equal or greater complexity, follows the QMS, and can be used to demonstrate capability for a certification program or endorsement. Mock exercises are a demonstration of capability that use an approved exercise provided by AISC Certification, not actual work, to demonstrate capability for a certification program or endorsement.
Section 6 Corrective Action Request Process

6.1 An auditor may issue Corrective Action Requests (CARs) during the Audit. If so, the Participant and Applicant has 30 calendar days from the last day of the audit to respond to each CAR. Evidence for ALL CARs must be uploaded to the participant portal at the same time. **Failure to submit evidence for all CARs by the due date indicated on the Audit Scope Sheet will result in the certification(s) being Withdrawn or Denied.**

6.2 Each CAR response must include the completed CAR form which contains:

- Actions to immediately correct or contain the nonconformance
- Result of root cause analysis
- Actions taken to correct root cause and prevent recurrence
- Supporting evidence files that verify the planned actions have been implemented

6.2.1 The CAR form and evidence will be reviewed by QMC. If the reviewer makes a request for additional evidence, the Participant or Applicant has 14 days to respond. If the reviewer makes a second, which is the final request for additional evidence, the Participant or Applicant has 7 days to respond. **Where a request for additional evidence has been made for more than one CAR, the evidence for ALL CARs must be submitted at the same time.** Failure to respond to a request for additional evidence for any of the CARs within the stated timeframes will trigger an “unsatisfactory” result. Any CAR that does not receive satisfactory evidence after the three attempts will be marked “unsatisfactory”. All reviews of corrective action, whether satisfactory or unsatisfactory, are then forwarded to AISC. An unsatisfactory recommendation may put the certification at risk.

Due to Repetitive CARs or systemic QMS issues, an additional audit to verify CAR effectiveness may be required by the CRG, even if all CARs are responded to with satisfactory results.

6.3 If the Participant or Applicant chooses to dispute or “challenge” the issuance of a CAR, they must complete the Part 2 response section of the CAR being disputed with the reason(s) for the challenge. Then uploaded the response to the audit in the participant portal. This must be done within 30 days of the conclusion of the audit

**Challenging a CAR(s) does not negate a Participant’s/Applicant’s obligation to resolve all other CARs within the required timeframe.**

The Participant or Applicant will then be contacted by AISC concerning the challenge, and an investigation will follow. The investigation concludes with a decision by AISC on the challenge, and the Participant or Applicant will be advised of the results and any additional actions needed.

Submission, investigation and decisions of the challenged CAR will not result in any discriminatory actions against the Participant or Applicant.
6.4 All documents required for the corrective action process, including evidence, shall be submitted in English.

Section 7 Certification Decisions

7.1 The AISC CRG determines the certification status of all Participants and Applicants. It is the role and responsibility of the CRG to deny, grant, expand, renew, reduce, or withdraw certification based on objective evidence of a Participant's or Applicant's ability to satisfy these GRs. Please note Certification fees will not be refunded.

7.1.1 The following definitions apply to CRG decisions:

Deny - the CRG has determined that the Participant's/Applicant's QMS or a portion of the QMS has failed to meet the GRs and the requested certification(s) or endorsements will not be granted.

Grant - the CRG has determined that the Participant or Applicant has successfully demonstrated the capability to meet the GRs and certification will be approved.

Expand - Following an application to add another certification or endorsement to an existing Participant's/Applicant's certification scope, the CRG has determined that the additional criteria has been met and the certification scope includes new certification(s) and/or endorsement(s).

Renew - the CRG has reviewed the results of the renewal audit and has approved the continued certification as stated in the Audit Scope.

Reduce - Upon review of the audit results, the CRG has determined that one or more certifications or endorsements will not be approved and the scope of the certification will reflect the removal of those certifications or endorsements.

Suspend - This may occur as a result of a CRG decision or as part of the Appeal process. The current certification is still valid until it expires and will not be renewed until further actions, designated by the CRG, are successfully completed. Furthermore, the Participant or Applicant will not be listed on the AISC Certification Search “Find a Certified Company”.

Withdraw - the CRG has made the decision to no longer continue the certification process and any issued certificates will expire on the date indicated on the certificate.

7.1.2 Conditional Certifications. The CRG may grant a conditional certification status when conditions do not provide for the Audit to be performed as a site assessment, and it is conducted as a remote assessment. This may occur for initial applications and scope change applications.

The difference between “Conditional Certification” and certification is that the physical portion or direct observation of the operations of the shop or field processes have not been assessed, but the
quality management system including procedures, manual and records have been reviewed and/or assessed.

Conditional Certifications assist new applicants and scope change applicants in obtaining a certification status when travel to the company or job site is prohibited by travel restrictions or in the case of a scope change, allows the participant to obtain a certification status for the scope change prior to their renewal audit.

See 7.4.2 for more details on Continuation Audits.

7.2 Certification decisions for Participants or Applicants receiving no CARs:
- Upon completion of the audit, QMC will perform a quality review of the results.
- QMC’s review along with audit findings are received and reviewed by AISC certification technical staff for program compliance.
- QMC and AISC reviews are then forwarded to the CRG for a certification determination.

Certification decisions for participants or applicants receiving CARs
- Upon completion of the audit, QMC will perform a quality review of the results.
- QMC’s review along with audit findings are received and reviewed by AISC certification technical staff for program compliance.
- Upon completion of the Audit and review is complete of all Corrective Action Requests (CARs) or the participant has exceeded the allotted time for satisfactorily responding to the CARs (see Section 6 for further details on the CAR process), QMC and AISC reviews are then forwarded to the CRG for a certification determination.

7.3 When making certification decisions, the CRG will also review and consider the prior three-year certification history and audit findings, and any complaints or allegations that have been received by AISC, as part of the basis for determining certification.

Audit findings from an individual audit may not lead to a negative decision. However, if the audit findings reveal a pattern of repetitive non-conformances over the past three years, it may indicate a breakdown in the Participant’s QMS. Repetitive non-conformances, especially non-conformances that reflect management disregard for their own quality management system are grounds for a withdrawal of certification.

7.4 CRG may choose to grant certification for less than one year if it is determined that an Additional Audit is needed to provide evidence of an effectively functioning QMS. When this occurs, any associated costs will be assessed according to the current fee schedule for the Additional Audit. No additional scope(s) will be considered in this audit. AISC also reserves the right to conduct short-notice or Unannounced Audits, if required. See 7.4.1 for more details on Additional Audits.
7.4.1 Additional Audit - This audit type is used as a follow-up to a renewal audit, initial audit, appeal, or complaint, and it may be required for the participant or applicant’s certification to continue or be granted. The CRG may require a more in-depth review of a participant's/applicant’s management system due to:

- Reviewing CAR effectiveness
- Closing an open CAR(s)
- Repetitive CAR(s)
- Appeals
- Complaints/Allegations

There is an additional fee associated with these audits.

7.4.2 Continuation Audit - These audits are the continuation of a remote or site assessment. They are noted with a “B” suffix in the audit scope and may be referred to as a “B Audit”.

- They can be performed to maintain a “conditional certification” status for an initial application or scope change.
- They are used when an erector does not have an active jobsite or a fabricator does not have active work during their renewal audit.
- They do not include audits performed for appeals or complaints.
- A continuation audit does not include reviewing CAR effectiveness.
- Open CARs cannot be closed out during a continuation audit.
- There is no additional cost as it is part of the renewal or initial audit process.

7.5 All Applicants and Participants have the right to Appeal any decision made by the CRG. The process of Section 9 is to be followed to Appeal a CRG decision.

7.5.1 All Applicants and Participants have the right to issue a complaint to AISC about any portion of the certification process. For complaints made to AISC concerning a certified company by parties involved in the contract, see Section 10 Complaints Process.

7.6 AISC will make information concerning certification status publicly available on its website. The information disclosed includes company name, location, company website, email and phone number, and certifications held.

7.7 Participants who hold a current valid certificate or conditional certification letter are eligible to use and display the Certified Fabricator or Certified Erector logo, as applicable. The appropriate logos can be found on the Participant’s account page on the participant portal.

7.8 Multiple fabricator/manufacturer certifications and endorsements for the same facility location are included on a single certificate. Erector certification and endorsements are included on a single certificate.
For Participants and Applicants of the erector certification program, the certificate will cover their regional office(s) or operation(s) only if all of the following conditions are met:

- The regional office(s) or operation(s) is doing business under the same company name.
- The Executive Management is the same as for the main office.
- The same Quality and Safety Management Systems were audited for the main office and project site.

Regional offices will not be listed on the AISC Certified Company directory nor will we grant additional certificates for regional offices or list them on your main office certificate.

The Certificate contains the following information:

- Name of the company holding the certification
- Address of the certified facility, which is the address where the audit occurs (for Erectors, this is the address of the corporate office)
- Listing of the certification(s) and endorsement(s) held
- Date certificate was issued
- Date certificate expires
- Signature of the AISC officer
- Certification Number

In addition,

- Only one facility address will be listed on a certificate.
- Certificates are non-transferable; see GR1.1.2 ownership, location, and company name changes.
- For companies with multiple fabrication shops, regardless of location, each facility must apply for certification with a separate application and hold a separate certificate.

The duration of certification is typically 12 months, and its expiration date is noted on the participant’s certificate or conditional certification letter. Exceptions to this will be communicated to the Participant or Applicant by AISC. Certificates are considered null and void if the AISC Certification Review Group (CRG) or Appeals Review Board (ARB) withdraw it.
Section 8 Making changes to the Certification Scope (for Participants changing a current certificate)

8.1 A Participant may request changes to their certification. All forms are found at www.aisc.org/certification.

- **Expanding the scope of certification.** The Participant must complete the AISC Certification Scope Change Application when they wish to apply to add additional certification(s) and/or endorsements to a current certificate.

- **Reducing the scope of certification.** The Participant may reduce scope prior to or during the assessment by completing a Certification Withdrawal Request form found at www.aisc.org/certification. Reducing the scope of the certification is completed when a Participant no longer desires to be audited to a certification(s) and/or endorsement(s) that is on their current certificate.

- **Withdrawing certification.** The Participant may withdraw certification by completing a Certification Withdrawal Request found at www.aisc.org/certification. Upon the decision to withdraw from the certification process, the current certificate will expire on the date indicated. Participants that withdraw their certification will be required to follow the application process to regain certification.

8.2 Changes to the certification scope may require additional submittals, documentation assessment, remote assessment, site assessment, demonstration of capability(s), and fees. All scope change requests shall be submitted to AISC for review.

At the time of application, scope change applicants shall submit QMS documents required by the Application Document Submittal for AISC Certification which can be found at www.aisc.org/certification/applicants.

8.3 Scope change applications can be submitted by a Participant at any time during their certification cycle. Not all scope changes can be added to scheduled audits due to audit duration and auditor constraints. All scope changes that do not become part of a scheduled renewal audit can be scheduled as stand alone audits and charged a renewal audit fee.

- You must go to www.aisc.org/certapplicants and complete the scope change application form.
- QMS documents required by the Application Document Submittal for AISC Certification which can be found at www.aisc.org/certification/applicants must be submitted at the time the application form is submitted.
- Upon receipt and processing of the application by AISCpayment within 14 days.
- Audits will not be rescheduled to accommodate a scope change.
**Section 9 Appeal Process**

9.1 Participants or Applicants that have their certification withdrawn, denied, or reduced may reapply six months after the date of notification by AISC per the terms of the withdrawal letter they received from the Certification Review Group or the Appeals Review Board. Alternatively, the decision may be appealed using the AISC Appeal Policy for Certification Determination (Appeal Policy). Certification fees will not be refunded.

9.2 Participants and Applicants will abide by the AISC Appeal Policy. This policy is available at www.aisc.org/certification.

**Section 10 Complaint Process**

10.1 Any applicant/participant (referred to as the complainant) in the AISC Certification program may file a complaint concerning their own certification processes, which may include applications, audits, reviews, CAR(s) response or other actions under direct control of AISC Certification.

10.2 All other complaints that are found to be outside GR10.1 activities will be referred to the AISC Complaint and Allegation Policy.

10.3 Each complaint will be acknowledged, reviewed, and validated. Valid complaints will be investigated and actions taken to resolve the complaint. Complaints and the context of the complaint shall be maintained confidential.

10.4 Results of the complaint, including any actions taken, will be communicated to the complainant.

10.5 Submission, investigation and decisions on complaints will not result in any discriminatory actions against the complainant.
