

QUALITY CERTIFIED ERECTORS

Each June, *Modern Steel Construction* publishes a list of AISC Quality Certified erectors as of press time. For the most accurate listing and more detailed information on Quality Certification, visit AISC Quality Certification on the web at www.aisc.org/quality.html or email certification@aisc.org.

What is a Certified Steel Erector (CSE)?

- Erection contractors providing services necessary for erection of structures, including, but not necessarily limited to, schools, shopping centers, light manufacturing plants, warehouses, low rise beam and column structures, light truss structures, simple non-continuous bridges, and steel frame buildings up to 10 stories in height.
- Management has expressed its commitment to quality and safety.

What is an Advanced Certified Steel Erector (ACSE)?

- Erection contractors providing services necessary for erection of structures, including, but not necessarily limited to, large public and institutional buildings, heavy manufacturing plants, bunkers and bins, major

bridges, continuous girder bridges, railroad bridges, power houses, major industrial facilities, locks and dams, high rise structures greater than 10 stories, and repair and rehabilitation of existing steel structures. Complex site-specific erections plans are typical, as well as the ability to erect over water.

- Management has expressed its commitment to quality and safety. The organization shall understand the procedures involved and have ready access to the requisite talent, resources, and experience necessary to erect complex steel structures involving techniques such as construction from water, staged construction for maintaining traffic, coordination with railroads, composite construction, concrete-core construction, close tolerance erection (as in architecturally exposed structural steel), and use of gantry and other specialized crane systems.

UNITED STATES

Cert.	Company Name	City	State	Certification Contact	Contact Phone
CSE	C.S.E. Inc.	Williston	VT	Bill Michaud	802.864.1812
