

## CORRESPONDENCE

### NICE JOB NASCC STAFF!

I haven't had the chance until now to e-mail anyone at AISC to thank them and tell them how much I enjoyed attending the NASCC in Baltimore in April. Everyone at AISC did an outstanding job! It was an incredibly educational opportunity for me and I am still in the process of relaying everything that I learned to the other engineers in our office. The people at AISC are the "model" that I wish other industry organizations would follow. This was my first steel conference and based on my positive experience I will be attending more in the future.

Some of what I learned at the conference is already being put to practical use in our office. We are currently working on our first Girder-Slab™ project. Dan Fisher from Girder-Slab was at the conference and he was a speaker at one of the seminars. Attending his seminar and talking to him at the Girder-Slab booth allowed us quickly learn a lot about this unique structural system. Since the conference we've had a tour of a Girder-Slab project that is currently under construction in Philadelphia and Dan will be visiting our office in several weeks to do an in-house seminar for our engineering staff. Thanks again!

P.S.: My two-year old grandson really enjoys playing with his AISC Steel Solutions Center Slinky™!

### THANK YOU, MSC!

Just a note to thank you all at *Modern Steel Construction* for what is unquestionably the finest publication in the steel fabrication field. The articles are interesting, informative and useful, and the advertising always seems to be pertinent to our needs and interests.

Thank you again for this outstanding magazine and a job well done.
