

**EMPLOYMENT NATIONWIDE
IN STRUCTURAL/MISCELLANEOUS/ and STEEL
BRIDGE FABRICATION**

ProCounsel is in communication with over 3,000 Structural, Miscellaneous and Steel Bridge Fabricators. There is a big, urgent demand for your knowledge and your years of experience. We can market your skills to the steel fabrication industry without identifying you. Further, we can target a specific geographic area. So we can place you in the city or state of your choice, at the right money, in the right job for you. The employer pays the employment fee and the interviewing and relocation expenses. If you've been thinking of making a change, now is the time to do it. The right location, the right job, at the right money.

AutoSD Steel Detailing

AutoSD Steel Detailing is a program written to run inside AutoCAD 13-2002, LT 2000-2002 and IntelliCAD 98-2001 for detailing structural and miscellaneous steel, erection drawings, roof frames, embedded items and general editing, beams, columns, bracing, stairs, stair rails, wall rails, ramp rails, ladders and hip and valley.

Automatic detailing is done with a minimum of input. You configure the program to your detailing requirements. It has Beam to Beam, Beam to Column and Vertical brace to Column connection matching. Carry through piece marks. Import dxf files created by SDS/2, Xsteel, Steelcad and CVSPRO for editing. Extract shop bill information for import into material manager program by E. J. E. Industries and FabTrol. Backed by a 45 day money back guarantee, no maintenance fees and free telephone support to ensure your satisfaction.

AutoSD, Inc., 8203 Lizelia Rd, Meridian, MS 39305, Voice/Fax (601) 679-5800

Steel Solutions Center Advisor

*Creative! Innovative! Helpful! Competent!
Quick! Computer Savvy! Teachable! Aggressive!*

If those words describe you as a structural engineer then the AISC Steel Solutions Center is the next step in advancing your career. As a result of an internal promotion, we have an opening for a solutions advisor in our Chicago headquarters. You will work with design and construction industry professionals in identifying and proposing innovative steel solutions for real world projects. Using your technical design experience and skills you will create conceptual solutions and identify ways of lowering costs and accelerating project schedules. This is not a job for the timid engineer who is comfortable spending months on a single project. In the Steel Solutions Center you will regularly be exposed to dozens of projects and develop professional contacts with industry leaders. The opportunity is yours to grow your competency in systems like Girder-Slab™, staggered truss, castellated beams, steel plate shear walls, seismic systems, mixed use structures, fire codes and fire protection systems while utilizing the newest releases of design and fabrication industry software.

AISC is a great working environment offering flexibility, professional development opportunities, excellent resources and a competitive salary with an excellent benefit package. You've always said "wouldn't it be great to work at an organization like AISC?", so if you are a graduate structural engineer with a minimum of 3 years of design experience send us your resume by e-mail today!

STRUCTURAL DESIGN ENGINEER. Multi-discipline Engineering firm has opening for motivated Engineer with a minimum of 4 years experience in design of private, municipal, public, commercial and industrial buildings. CAD skills a must. Must be able to work directly with Architectural & direct clients. Must have excellent verbal & written skills. Submit resume & references to Marquess & Assoc., Inc., P.O. Box 490 Medford, OR 97501; via e-mail to info@marquess.com.

Marketing Manager, AISC Certification

Are you an extroverted, structural engineer that is tired of sitting at your desk and crunching numbers? Do you look forward to a phone call from the General Contractor simply because you love talking to people? Do you have a passion for assisting engineers, architects, owners and contractors in their use of structural steel? If so, the American Institute of Steel Construction is looking for you! We are looking for someone who knows how important quality is in completing a project on time and under budget-and can't wait to tell everyone all about it. Please help us educate the marketplace regarding the value a Certified fabricator can bring to a project. Your technical and design background in structural engineering will help you speak the language of other specifying engineers. And you will have the opportunity of a lifetime to interact with world leaders in the design and construction industry.

It won't be easy...you need excellent promotional skills, public speaking ability, creativity, an appreciation of the unique role of each individual on the design-construction team and DRIVE. Couple those with at least four years of experience in structural engineering or architecture and you'll find yourself in a position that is the perfect fit for your skills and talents.

The position is located in our headquarters in Chicago. AISC provides the resources and a competitive salary with excellent health and retirement benefits. You provide the passion!
