

Metal Deck Products

ASC Steel Profiles, Inc.
 2110 Enterprise Boulevard
 West Sacramento, CA 95691
 Ph: 800.360.2477
 www.ascprofiles.com; www.ascsd.com

ASC Steel Deck has developed a side seam attachment system that is a revolutionary alternative to welding. Engineers can rest assured the DeltaGrip™ System can be found in the most current ASC Steel Deck ICBO report along with the calculations that support a robust roof system. The

DeltaGrip™ Tool is an easy to use pneumatic tool that clutches the seams together in one-seventh the time of welding and includes a Go-No-Go gauge to ensure that each grip stacks up to its name. The DeltaGrip™ tool is lightweight and easy so the installation is fast, safe, and consistent.

Canam Steel Corporation
 4010 Clay Street
 Point of Rocks, MD 21777
 Ph: 301.874.5141
 Fax: 301.874.3248
 www.canamsteel.com

Canam Steel Corporation, one of North America's largest joist suppliers, also produces steel deck profiles. Canam is a member of the Steel Deck Institute, and offers deck profiles, including roof, floor and

composite. All deck profiles are available in G6, G10 or painted. Call to locate the nearest Canam office, and visit the web site to download a deck catalog.

Curveline, Inc.
 1745 E. Monticello Court
 Ontario, CA 91761
 Ph: 888.998.0311
 Fax: 909.947.1510
 www.met-tile.com/curveline

Curveline's service center provides custom crimp-curving of "B"-deck and "N"-deck profiles into the desired radii and angles of curvature.

Crimp-curving increases panel strength—making it possible to achieve multiple-span panel designs that use lighter gauge material. Applications include standard, perforated and acoustical decking panels. For acoustical applications, the panels provide "two-in-one" performance, functioning both as roof deck and acoustical ceiling. The company curves roofing and siding panels (exposed and concealed fastener profiles) to form curved walls, fascias, roofs, canopies, walkway covers and more.

DACS, Inc.
 900 Port Centre Parkway
 Portsmouth, VA 23704
 Ph: 757.393.0704
 Fax: 757.93.461
 www.dacsinc.com

DACS, Inc. offers a full line of roof and floor decks, including A, B, F, N, J and H roof decks, S-deck, heavy duty form deck, 1.5", 2" and 3" composite floor decks and B, N, J and H cellular decks! We also provide detailing services and a full line of decking accessories. Quick ships are no problem. Customer service sets us above the rest.

D-MAC Industries, Inc.
 1880 D-MAC Drive
 Alpharetta, GA 30004
 Ph: 800.878.3622
 Fax: 770.664.5682
 www.d-macindustries.com

D-MAC manufactures steel bridge form and accessories, and is a steel-deck service center. In bridge form, D-MAC produces 1.5", 2.0", 2.5", and 3.0" corrugated sections from 16 gauge to 22 gauge, and accessories. The D-MAC steel-deck service center offers nationwide shipment of all standard sections of roof

deck, form deck, and composite floor deck in any length, gauge, and finish. All material cut to size (length or width) is supplied with mill-quality edges. D-MAC manufactures deck accessories in standard and custom shapes, and supplies rubber closures, fasteners, and related items.

Hilti, Inc.
 5400 S. 122nd E. Ave.
 Tulsa, OK 74146
 Ph: 800.879-8000
 Fax: 800.879.7000
 www.us.hilti.com

With the SDT 25 Decking Tool, the 110-volt Hilti ST 1800 Adjustable Torque Screwdriver converts quickly and easily from a hand-held to a stand-up system. It virtually eliminates the need to bend over and can be used for fastening deck sidelaps and attaching metal deck to thin bar joists and purlins. With two adjustable handles, the

system promotes operator comfort and productivity because it's less tiring to use for repetitive applications. The system fastens up to three times faster than traditional fastening methods and holds 50 screws. The screwdriver's 18-position adjustable torque control provides precise screw setting and the

system's heavy-duty design helps ensure longer tool life. It also features a quick, easy jam release mechanism and rotating nosepiece, so operators can fit into narrow profiles.

MBI Products Company, Inc.
 5309 Hamilton Avenue
 Cleveland, OH 44114-3909
 Ph: 216.431.6400
 Fax: 216.431.9000
 www.mbiproducs.com

MBI manufactures acoustical products of all types and provides insulation for perforated acoustical metal-deck flutes. Insulation is available in different thicknesses and densities, and comes in rolls or pieces.

New Millennium Building Systems
 6115 County Road 42
 Butler, IN 46721
 Ph: 260.868.6060
 Fax: 260.868.6002
 www.joist-deck.com

New Millennium offers metal roof and floor deck. The deck is designed and produced per Steel Deck Institute specifications. The following profiles are available: 1.5B, 1.5BA, 3N, 3NA, .6FD, 1.0FD, 1.5FD and 2.0FD. (A: Acoustical, FD: Form Deck). Also available are the 1.5 and 2.0 composite profiles. Finishes can be prime-painted or galvanized. The standard prime-painted finish is gray on both the top and bottom side. The galvanized finish is available in G40, G60, & G90 coatings.

Nucor's Vulcraft Group is the nation's largest producer of steel joists, joist girders and steel deck. Vulcraft also works with highly engineered products like composite floor joist. Vulcraft supplies product for a wide range of structures. Vulcraft products are made from more than 90 percent recycled materials and have been essential elements in green buildings.

Pneutek, Inc.

Pneutek, Inc.
17 Friars Drive
Hudson, NH 03051-4926
Ph: 603.883.1660
Fax: 603.882.9165
www.pneutek.com

The Pneutek Air/Safe Fastening System is a pneumatically actuated drive system for mechanically attaching steel roof and floor deck to a building's structural frame. The all-weather tool drives one-piece fasteners into any thickness of steel above 1/8" minimum substrate in all commercially specified grades of steel to meet today's building design requirements. With tool capability of one actuation every three seconds, the system is a fast, safe, economical and widely applicable method for attaching steel deck. The shear capacity of these fasteners allows one-for-one direct replacement of 5/8" diameter puddle welds in all the typical attachment patterns and deck gages. Pneutek fasteners are recognized by the Steel Deck Institute, the ICC Evaluation Service, Inc., Factory Mutual (FM Approvals) and by many local acceptance authorities. Pneutek's patented low-velocity actuation design meets or exceeds all OSHA and ANSI safety requirements.

Roof Deck Inc.

80 Twin Rivers Drive
Hightstown, NJ 08520
Ph: 609.448.6666
Fax: 609.443.0784
www.roofdecking.com

Complete manufacturer of roof and floor deck products. Delivery is fast, and most items can be manufactured in just one day!

Steel Deck Institute

P.O. Box 25
Fox River Grove, IL 60021
Ph: 847.458.4647
Fax: 847.458.4648
www.sdi.org

The Steel Deck Institute is the trade association for manufacturers of steel floor and roof decks, and related products. The SDI provides industry guidelines for engineering design, manufacture and field use of steel decks. SDI also prepares, reviews, and distributes literature, and liaisons with construction-industry associations on matters of common interest.

Verco Manufacturing Co.

4340 N. 42nd Avenue
Phoenix, AZ 85019
Ph: 602.272.1347
Fax: 602.269.1758
literature-request@vercodeck.com

The Verco PunchLok® system achieves high shear values through economical, high-quality side-seam attachments. The PunchLok® system was tested on all Verco™ interlocking products. Testing included 1½" deck pinned to supports. With a variety of attachment and finish options, Verco offers flexibility to combine systems, minimize construction time and maximize savings.
