AutoSD Steel Detailing

AutoSD Steel Detailing runs inside AutoCAD 14 - 2005, LT 2000 - 2005 and IntellCAD for detailing structural and miscellaneous steel, roof frames, embedded items, beams, columns, bracing, stairs, stair rails, wall rails, ramp rails, ladders, hip and valley, creating erection drawings and general editing.

Automatic detailing is done with a minimum of input. You configure the program to your detailing requirements. It has Beam to Beam, Beam to Column and Vertical brace to Column connection matching. Carry through piece marks. Import dxf files created by SDS/2, Xsteel, Steelcad and CVSPRO for editing. Extract shop bill information for import into material manager program by E. J. E. Industries and FabTrol. Extract CNC data for Franklin drill line and Peddimat. Backed by a 45 day money back guarantee and free telephone support.

VP/General Manager

Hillsdale Fabricators, the \$40 millions steel fabrication division of St. Louis-based Alberici Constructors, Inc., is seeking a VP/General Manager. This individual will be responsible for Hillsdale's overall P&L and will be a member of Alberici's Leadership Group. The VP/General Manager will report to the President of Alberici Constructors.

The VP/General Manager is responsible for safety compliance, leadership development, annual budget development, and for establishing and achieving business goals. Other responsibilities include review and approval of all pricing and proposal submissions, detailing and shop production. The ideal candidate must have the skills necessary to develop and acquire new business.

The ideal candidate will be a proven leader, hold a bachelor's degree in an Engineering discipline (MBA desired), and have at least 10 years' experience in the steel fabrication industry with 2-5 of those years as a plant manager. The candidate will possess strong business acumen along with an in-depth knowledge of project management, scheduling and project controls.

Hillsdale Fabricators is a structural steel, miscellaneous iron and structural plate fabricator with a 25,000 ton per year capacity. AISC and SSPC certified.

Taylor Technical Publications & Consultants

Helping steel fabricators comply with the
AISC Standard for Certification of Steel Building Structures

You may choose to have one of our Certification & Compliance Specialists work with you to complete any or all of the following:

- Conduct a GAP analysis of your documentation to the standard.
- Bring your quality manual and procedures into compliance.
- Conduct a pre-audit assessment to prepare your shop.
- Provide assistance during your formal audit.

Please contact **Janette Taylor at 480/423-7072 or jtaylor@ttpcinc.com**

AMERICAN INSTITUTE OF STEEL CONSTRUCTION (AISC) DIRECTOR OF TECHNOLOGY INITIATIVES

We are looking for a talented individual with project management experience, preferably in the architectural, engineering, and construction industry.

Essential duties and responsibilities include the following:

- As secretary of the AISC Information Technology Committee, work closely with the Chairman to coordinate meetings, strategic planning review, and all sub-committee activity.
- Proactively identify and communicate information technologies that support AISC business goals and strategies in conjunction with AISC IT Committee.
- Define and present recommended initiatives to the Strategic Planning Committee for funding.
- Manage full life cycle development of approved AISC IT Strategic Initiatives including CAD interoperability standards, XML e-commerce standards, and web-related technologies.
- Give presentations on AISC IT Initiatives at industry-related conferences, meetings and events.
- Identify, procure and manage all required vendors and consultants for AISC Technology Initiatives.

Requirements:

- Minimum 3 years architectural, engineering, and/or construction project management experience or
- Minimum 3 years CAD design or drafting experience or
- Minimum 3 years XML-based e-commerce development
- Construction industry-related standards experience preferred
- Bachelor of Science in IT, Engineering, or Project Management with Masters degree preferred

We offer a competitive salary and excellent benefits package.
Send resumes and salary requirements to DirTechInitiatives@aisc.org.

Equal Opportunity Employer

EMPLOYMENT NATIONWIDE
IN STRUCTURAL/MISCELLANEOUS/ and STEEL BRIDGE FABRICATION

ProCounsel is in communication with over 3,000 Structural, Miscellaneous and Steel Bridge Fabricators. There is a big, urgent demand for your knowledge and your years of experience. We can market your skills to the steel fabrication industry without identifying you. Further, we can target a specific geographic area. So we can place you in the city or state of your choice, at the right money, in the right job for you. The employer pays the employment fee and the interviewing and relocation expenses. If you've been thinking of making a change, now is the time to do it. The right location, the right job, at the right money.

POSITION OPEN

President—American Institute of Steel Construction, Inc.

AISC seeks a dynamic leader to advance the industry's efforts to grow steel's share of the construction market. AISC's president has direct responsibility for establishing and updating the Institute's Long Range Strategic Plan as well as overall responsibility for all AISC departments and activities. The successful candidate will have a track record of success in managing a complex and expanding organization and in maintaining and growing profit centers. The president must be able to lead a high-energy, aggressive, technical and marketing staff and must have both technical and financial expertise. A familiarity with AISC and the steel industry is important—but equally critical is a vision for the future of the Institute. Fabrication or steel industry experience is needed and a civil/structural degree is preferred. Please send resume and cover letter to Jim Stori, AISC Chairman, c/o STS Steel, 301 Nott Street, Bldg. #304, Schenectady, NY 12305.
