### ENJOY THE COLORADO LIFESTYLE

Skiing and Sports Teams Galore!!!!  
 What more could a steel detailer need!

Boulder Steel, Inc., one of the largest steel fabricators in the Rocky Mountain Region, is seeking additional steel detailers to add to the staff of seven SDS/2 detailers. Located one hour from Rocky Mountain National Park and close to the best ski resorts in the country, Boulder Steel offers excellent pay, great benefits, 401 (k), profit sharing, overtime and a relocation allowance. If you are an advanced SDS/2 or other experienced steel detailer looking for a great opportunity and a great place to work, then you need to respond to this ad! EOE M/F/D/V

Boulder Steel, Inc., 11575 Teller Street, Broomfield, CO 80020  
 (303) 466-3900, (303) 466-6400

## AISC Steel Solutions Center Advisor

*Creative! Innovative! Helpful! Competent!*  
*Quick! Computer Savvy! Teachable! Aggressive!*

If those words describe you as a structural engineer, then the AISC Steel Solutions Center is the next step in advancing your career. As a result of an internal promotion, we have an opening for a solutions advisor in our Chicago headquarters. You will work with design and construction industry professionals in identifying and proposing innovative steel solutions for real world projects. Using your technical design experience and skills, you will create conceptual solutions and identify ways of lowering costs and accelerating project schedules. This is not a job for the timid engineer who is comfortable spending months on a single project. In the Steel Solutions Center, you will regularly be exposed to dozens of projects and develop professional contacts with industry leaders. The opportunity is yours to grow your competency in systems like Girder-Slab™, staggered truss, castellated beams, steel plate shear walls, seismic systems, mixed use structures, fire codes, and fire protection systems while utilizing the newest releases of design and fabrication industry software.

AISC is a great working environment offering flexibility, professional development opportunities, excellent resources, and a competitive salary with an excellent benefit package. You've always said, "Wouldn't it be great to work at an organization like AISC?" So if you are a graduate structural engineer with a minimum of 3 years of design experience, send us your resume by e-mail today!

Contact: Jason Ericksen, S.E., Director - Steel Solutions Center

## Structural Steel Estimator

Structural/Miscellaneous metals fabricator located near Orlando, FL and Kennedy Space Center seeks an experienced structural steel estimator with at least 5 years experience in the commercial and industrial sectors. Candidate is responsible for estimating, preparing scope letters, and submitting bids. Ideal candidate must have good written and verbal communication skills and must be knowledgeable in the use of computers. Successful candidate should be proficient in using Microsoft Office (Excel, Word, etc.).

Competitive salary will be based upon experience, with benefits offered including 401k, life insurance, premium health plan, holiday pay, and paid vacation.

For immediate consideration, please e-mail your resume to [krd@metconinc.com](mailto:krd@metconinc.com). We are an Equal Opportunity Employer and maintain a drug-free workplace.

## Industry Mobilization Director

Are you a **sales and marketing professional** looking for a new challenge that is different, exciting and challenging? Do you enjoy thinking strategically, working against long term goals, helping others transition their skill sets, juggling multiple tasks and managing numerous high level relationships? Can you motivate volunteers to achieve new goals and help strengthen an entire industry? Do you understand how to reach key project decision makers? Are you ready to step out of your comfort zone and learn more about structural steel than you ever dreamed there was to learn?

The structural steel industry is looking for the right person to take the lead in **mobilizing industry sales resources** to focus their talents on making structural steel the material of choice. This will involve training and motivating sales professionals to look outside of their typical customer base and develop upstream relationships with owners, general contractors, architects and engineers.

The **American Institute of Steel Construction**, founded in 1921 as the trade association for the structural steel industry, is pioneering a new Industry Mobilization initiative and looking for a seasoned sales and marketing professional as initiative director. The ideal candidate will have a bachelor's degree with at least 10 years of experience marketing solutions to building owners, developers, architects, general contractors and structural engineers. An exposure to structural engineering and the use of structural steel in construction would be beneficial. Strong communication, teaching and computer skills are a must. The position is Chicago based but will require significant travel throughout the United States.

**To submit your resume for consideration or to request a full job description, please contact John Cross, Vice President, AISC Marketing LLC at [cross@aisc.org](mailto:cross@aisc.org).**

## AutoSD Steel Detailing

AutoSD Steel Detailing runs inside AutoCAD 14 - 2005, LT 2000 - 2005 and IntelliCAD for detailing structural and miscellaneous steel, roof frames, embedded items, beams, columns, bracing, stairs, stair rails, wall rails, ramp rails, ladders, hip and valley, creating erection drawings and general editing.

Automatic detailing is done with a minimum of input. You configure the program to your detailing requirements. It has Beam to Beam, Beam to Column and Vertical brace to Column connection matching. Carry through piece marks. Import dxf files created by SDS/2, Xsteel, Steelcad and CVSPRO for editing. Extract shop bill information for import into material manager program by E. J. E. Industries and FabTrol. Extract CNC data for Franklin drill line and Peddimat. Backed by a 45 day money back guarantee and free telephone support.
