Industry Mobilization Director

Are you a **sales and marketing professional** looking for a new challenge that is different, exciting, and challenging? The structural steel industry is looking for the right person to take the lead in **mobilizing industry sales resources** to focus their talents on making structural steel the material of choice. This will involve training and motivating sales professionals to look outside of their typical customer base and develop upstream relationships with owners, general contractors, architects and engineers.

The **American Institute of Steel Construction**, founded in 1921 as the trade association for the structural steel industry, is pioneering a new Industry Mobilization initiative and looking for a seasoned sales and marketing professional as initiative director. The ideal candidate will have a bachelor's degree with at least 10 years of experience marketing solutions to building owners, developers, architects, general contractors and structural engineers. An exposure to structural engineering and the use of structural steel in construction would be beneficial. Strong communication, teaching and computer skills are a must. The position is Chicago based but will require significant travel throughout the United States.

To submit your resume for consideration or to request a full job description, please contact John Cross, Vice President, AISC Marketing LLC at cross@aisc.org.

Do you think you need
a consultant
 to become AISC Certified?
Think again!

Visit **www.qmconline.com** for samples of most of the documentation required for AISC Certification. You'll find:

- a sample quality manual, including instructive comments
- sample procedures, with guidance on writing procedures
- required references for your library
- sample equipment lists and facility plans
- samples of internal audits

For useful tips on finding the right consultant, visit **www.qmconline.com/thinkagain**.

And if you have questions about becoming AISC Certified, contact 312.670.7520. At Quality Management Company, we're here to help!

AutoSD Steel Detailing

AutoSD Steel Detailing runs inside AutoCAD 14 - 2005, LT 2000 - 2005 and IntelliCAD for detailing structural and miscellaneous steel, roof frames, embedded items, beams, columns, bracing, stairs, stair rails, wall rails, ramp rails, ladders, hip and valley, creating erection drawings and general editing.

Automatic detailing is done with a minimum of input. You configure the program to your detailing requirements. It has Beam to Beam, Beam to Column and Vertical brace to Column connection matching. Carry through piece marks. Import dxf files created by SDS/2, Xsteel, Steelcad and CVSPRO for editing. Extract shop bill information for import into material manager program by E. J. E. Industries and FabTrol. Extract CNC data for Franklin drill line and Peddimat. Backed by a 45 day money back guarantee and free telephone support.
