COSEN SAWS SH-1300LF
Cosen’s new SH-1300LF straight-cut band saw is ideal for cutting structural and large beams. It features a 20-hp blade motor, a 2½-in.-wide blade, an independent control panel and a heavy-duty Quad Rail design (two per side) for added stability. It can cut up to a 51.2-in.-wide piece of material and features Cosen’s helical bevel gearbox for engine power and endurance, blade speed management, an integral coolant system and blade guidance for cut efficiency and maintaining blade life.

OCEAN BLASTER SHOT BLAST SYSTEM
The Ocean Blaster is an ultra-compact, fully integrated shot blast solution that will fit any steel fabricator’s space and budget requirements. The exceptionally efficient turbine design allows fabricators to clean steel with low power consumption, reducing costs even further. Pre-blasting steel reduces grinding, cleaning and reworking and creates a clean work environment, improving morale and safety. Also, when placed in-line with a plasma machine, the Ocean Blaster makes an ideal solution to remove the inevitable dross that is left behind. The entire Ocean Blaster, including dust-extraction unit, requires only 12 ft × 25 ft of floor space and only 13 ft of headroom, making it ideal for even the smallest fabrication shops. Despite its compact size, the Blaster will handle all profiles up to 40 in. tall and 20 in. wide.

For more information, visit www.oceanblaster.com or call 800.286.3624.

AUTOMATED LAYOUT TECHNOLOGY
LIGHTNING RAIL
The Lightning Rail is the first automated marking machine created specifically for the layout of handrails, but can be used for so much more. Forget about the countless hours spent with tape measures, squares and soapstone. Your layout times will be reduced to a fraction of the time, and the machine works with any DXF file. Marking ink washes off quickly and easily. The compact design will fit easily into your existing fabrication environment. Tables are offered in 4-ft and 8-ft widths with a length just under 30 ft.

For more information or to see a video demonstration, visit www.automatedlayout.com or call 603.402.3055.
